Ibnousah.nawal06@gmail.com

St Ouen, France

ACADEMIC PROFILE:

Interdisciplinary researcher and educator with a background in English Studies and a research Master's degree in Language Studies. My academic work explored the intersections between language, neurodiversity, educational psychology using both theoretical and field-based methodologies. My previous BA where I implemented Universal Design for Learning (UDL) protocols for Autistic learners and my Master's degree in language acquisition laid the intellectual foundation for my current research interests that center on psycholinguistics, metacognition, developmental psychology, cognitive neuroscience and diversity, with primary focus on dyslexia. I now seek to extend this work through doctoral research by deepening my understanding of how a learner's awareness of their specific learning and language disorder influences their state of 'readiness' when approaching the language tasks they are faced with. With the aim of contributing to more effective, ethical, evidence-based and inclusive pedagogical practices.

EDUCATION:

Master in English - LLCER (Research Track), ICP (2023–2025)

Research-focused program combining cultural studies, language, and interdisciplinary humanities. Academic work examined neurodiversity in language learning (dyslexia, dysarthria, dysgraphia), language acquisition, art-based pedagogies, and media analysis. Training included theoretical research methodologies and field-based research practices (functional neuroimaging - fMRI, statistical analysis and quantitative data modelling, acoustic voice and video analysis).

Bachelor of Arts (Licence) in English Linguistics (Research Specialization), Université Ibn Zohr (2017–2021)

Undergraduate research integrating linguistics and inclusive pedagogy. Conducted field research on the implementation of Universal Design for Learning (UDL) in educational contexts involving autism in Morocco.

Certificate of Completion - Professional English & Business Communication (Advanced Level), EMAA Business School (2018–2019)

Baccalauréat - Sciences Économiques et Gestion (French Curriculum), Al Massira Al Khadra (2014–2016)

RESEARCH EXPERIENCE:

Master's Research Project (2023–2025)

Language acquisition in the cases of Dyslexia, Dysgraphia, and Dysarthria; and the use of art therapy.

Undergraduate Research Project (2020–2021)

The use of (UDL) Universal Design for Learning in the case of Autism.

PUBLICATIONS:

Ibnou Saih, N. (2024). [*"The Art of Language: How Art Therapy Enhances Language Learning."*](#) Carnet Investigatio.

Ibnou Saih, N. (2026). [*"The Postictal State."*](#) Medium.

Ibnou Saih, N. (2026). [*"Elegance Constructed: Fashion, Femininity, and Power in Victorian Art."*](#) Medium.

Ibnou Saih, N. (2026). [*"The Rise and Fall of MTV: When a Music Empire Forgot Its Identity."*](#) Medium.

TEACHING EXPERIENCE:

Montessori English Teacher, La Maison des Enfants Montessori, Montreuil (2026–Present)

Delivered English instruction within a Montessori educational framework, using learner-centered and developmentally responsive methods. Supported language acquisition through autonomy, sensory-based learning, and individualized progression.

Volunteer Community Support Worker, Benenova, Paris (2024–Present)

Participated in diverse volunteer initiatives supporting vulnerable communities, including individuals with disabilities and people experiencing housing insecurity. Contributed to inclusive social, educational, and community-based activities promoting dignity, participation, and social connection.

Private English Tutor / Educational Support, Paris (2024–Present)

Individualized English instruction using adaptive pedagogical strategies. Focus on language acquisition and learner-centered methodologies.

Volunteer English Teacher, AWRACH Club FSR, Tiznit (2022–2023)

Designed and led English conversation workshops for disadvantaged students using immersive communicative practices.

Creative & Artistic Volunteer, Association FDS, Agadir (2018–2019)

Facilitated mural projects and creative workshops for children, including participants with diverse learning needs. Employed visual art as a medium for expression, autonomy, and collaborative engagement.

RESEARCH INTERESTS:

Psycholinguistics; Metacognition; Educational Sciences; Cognitive Neurosciences; Applied linguistics; Specific Language and Learning Disorders (SLLD); Neurodiversity and inclusive pedagogy;

LANGUAGES:

Arabic - Native

English - Fluent

French – Upper-intermediate (B2-C1)

TECHNICAL SKILLS:

- Qualitative & Quantitative Research Methods
- Statistical Analysis & Data Visualization
- Field-based Educational Research
- Experimental Design & Scientific Monitoring
- Neuro-imagery (fMRI)
- Chronological & Comparative Research
- Data Collection & Results Discussion
- Systematic Observation & Fieldwork
- Voice & Video Analysis (Recording & Interpretation)
- Survey, Questionnaire & Interview Design
- Academic Writing, Editing & Translation
- Cultural & Media Analysis
- Technical Communication
